

Philmac Fittings

Specialized plumbing compression fittings.

The Philmac 3G Compression series of fittings provide a compact, lightweight, and user friendly design that reduces the overall possibility of pipe twist while reaming completely serviceable.

ADVANCED SOLUTIONS

Philmac is a global leader in the design and manufacture of specialized fittings for polyethylene and other non-metallic pipes. The Philmac 3G Compression fittings line-up is the next generation of water line compression fittings and offers the most advanced and interchangeable solutions available on the market today.

ERGONOMIC, INTERCHANGEABLE

Heat-Line is pleased to offer a wide range of Philmac 3G Compression style fittings designed for connection of polyethylene water pipes which includes SIDR IPS, OD IPS, and CTS normal dimension pipes. Philmac fittings are constructed out of highly developed thermoplastic material and feature a solid ergonomic grip and exceptional interchangeability. Philmac fittings are both NSF and CSA certified for potable water applications, both in above and below ground applications. The Philmac 3G Compression series of fittings provide a compact, lightweight, and user friendly design that reduces the overall possibility of pipe twist while reaming completely serviceable. In comparison to other compression fittings available on the market Philmac 3G Compression fittings are design to exceed required life expectancy ratings of 50 years and offer Philmac's unique Slide and Tighten technology.

PROUDLY RECOMMENDED

Heat-Line is proud to recommend Philmac 3G Compression fittings as the premium choice for customers concerned with a long term performance and reliability. Heat-Line is pleased to offer an extensive line-up of Philmac 3G plumbing fittings to meet the growing needs of the plumbing industry. The Heat-Line part numbers below represent the most commonly requested Philmac fittings, and therefore are readily available in inventory.

SPECIAL ORDERS AVAILABLE
