

# Submersible Pump Stand and Submersible Pump Wire

*Lake line water supply accessories.*

Winterizing a water supply pipe from a lake, river, and or other water body is one of the most rewarding investments a homeowner can make in their property. Heat-Line makes this investment possible by developing and manufacturing the most advanced heating cable systems available, and offers submersible pump wire and submersible pump stands to compliment your water supply system.

## Submersible Pump Stand and Submersible Pump Wire

### Submersible Pump Stand

Heat-Line offers a submersible pump stand kit which provides vertical steadiness, stabilization, and mechanical protection for your pump, without jeopardizing performance. It is designed to suit many types of submersible pumps and may be adjusted in the field to suit various conditions or requirements. Heat-Line can also provide custom submersible pump stands to suit larger pumps at the request of our customers.

### Submersible Pump Wire

Heat-Line recommends and supplies high quality TECK-90 armoured jacketed cables with watertight breakout boots for electrical pump installations in lakes, rivers and other open water bodies. This cable is sealed from moisture ingress to reduce insulation resistance breakdown (IR drop). These cables can be buried directly in the ground, are durable and offer excellent mechanical protection all the way to the pump.

The advantage to the TECK-90 armour jacketed submersible pump wire is that unlike common unprotected PVC jacketed deep well pump wire, the armoured wire prevents mechanical damage within the waterbody and over or under the ground. Furthermore, the wet-location approved TECK-90 cable prevents moisture from breaking down the internal conductor insulation which can lead to IR drop and GFCI conditions.
